Editorial

As a pioneer in the field of health prevention and resolutely focused on innovation, the Ramsay Santé Foundation is pleased to see this topic gradually take center stage in the public debate. In 2024-2025, strong with this head start, it continued to act to promote access to health prevention for all, while supporting innovative initiatives that allow a more concrete and effective implementation of prevention.

In 2024-2025, strong with this head start, it continued to act to promote access to health prevention for all, while supporting innovative initiatives that allow a more concrete and effective implementation of prevention.

In this spirit, for the first time, our employees in France were fully involved in the selection of the associations supported by the Ramsay Santé Foundation for three years. Thanks to their commitment, six organizations working for youth mental health, women's health, caregivers, or even environmental health benefit from funding for three years to support their actions. Now European, the Ramsay Santé Foundation also chose two charitable organizations to support in Sweden, Norway and Denmark.

At the same time, the eagerly awaited publication of the 2nd Stress Observatory, a survey conducted in France, Sweden, and Italy, provides new insights into lived realities and nourishes our action as well as our European advocacy for prevention adapted to today's challenges.

Innovation continues to drive our commitments. Prevent2Care, bringing together start-ups and associations in Europe, now stands as a lasting reference at the interface between health and social entrepreneurship, impacting up to 6 million people since its creation.

Lastly, the Ramsay Santé Foundation initiated a new project this year around health literacy, in partnership with Croix-Rouge Compétence: a serious game to train, raise awareness, and equip everyone with skills to understand health information, which is essential to fully manage one's health journey.

These achievements illustrate our ongoing commitment to outreach, protecting the most vulnerable, and relentless innovation, making health prevention a truly shared priority for our country.

Governance of the Ramsay Santé Corporate Foundation*

as of June 30, 2025

Board of Directors

President: Pascal ROCHÉ,
CEO of Ramsay Santé Group

Directors appointed by the founder:

- **Lilias BOUMELIT**, director of Hôpital privé de l'Est parisien, Ramsay Santé
- **Per-Helge FAGERMOEN**, director of operations and development Norway, Ramsay Santé
- **Pr. Patrick JOURDAIN**, medical director France, Ramsay Santé
- **Christian Bech HONGAARD**, director of operations and development Denmark, Ramsay Santé
- **Dr. Xavier RICHOMME**, medical director for mental health, Ramsay Santé
- **Philippe TORCELLY**, director of human resources France, Ramsay Santé
- **Dr. Britta WALLGREN**, director of operations and development Sweden, Ramsay Santé

Ex-officio directors:

- **Didier BONNEAU**, deputy general director, Institut Pasteur Lille
- **Axel DAUCHEZ**, president, make.org
- **Nicolas HAZARD**, founder and president of INCO
- **Marie-Laure MOURRE**, associate professor, Université Paris Est Créteil

Scientific Committee

(as per the Foundation's internal regulations)

- **Dr Stéphane LOCRET**, medical advisor to the Foundation, Director of Research and Teaching, Ramsay Santé
- **Dr Pierre-André BECHEREL**, dermatologist, Hôpital privé d'Antony, Ramsay Santé
- **Thibault DESCHAMPS**, Sport & Health expert, president of the "Vivons en Forme" program
- **Dr Pamela NESSLANY**, nutritionist, Hôpital privé Arras Les Bonnettes, Ramsay Santé
- **Dr Magali BRIANE**, psychiatrist, addiction specialist, Clinique Mon Repos, Ramsay Santé
- **Dr Marion ZAMI**, physician addiction specialist, Clinique Saint-Barnabé, Ramsay Santé
- **Corinne ROCHETTE**, university professor in management sciences, Université Clermont Auvergne, CleRMa Research Laboratory
- **Dr Éric LABOUTE**, chief physician, CERS Capbreton, Ramsay Santé, scientific director of the French Society for Sports Traumatology (SFTS)

Foundation Team

- General Delegate: **Brigitte CACHON**
- General Secretary: **Laure-Emmanuelle LE GALL-PLOUSSARD**
- Project Manager: **Laetitia GLAD**

* In this report, the Ramsay Santé Corporate Foundation will be referred to as "the Foundation" or "FRS".

Details of actions 24/25

Supporting
INNOVATION

To make health prevention an essential lever for a more effective and sustainable healthcare system, the Foundation acts to facilitate the emergence of innovative solutions.

6th France cohort: 11 start-ups and 4 associations

Prevent2Care: the ‘Health Prevention and Innovation’ incubator for expert support of start-ups and associations

After five cohorts, the Ramsay Santé Foundation and its co-partners decided to evolve the Prevent2Care program, reducing the number of supported start-ups and associations from 25 to 15 for cohort #6.

The aim was to offer **more personalized and higher-quality support** to project leaders, while fostering **deeper and lasting connections** with the program’s partners: the Ramsay Santé Foundation, the Pfizer Innovation France Endowment Fund, and Elior Santé. These collaborations have created concrete synergies, enabled joint events, and facilitated participation in clinical studies.

Furthermore, the organization on the INCO side—our operator—has improved, both in project selection and follow-up, thanks to a **personalized management platform and closer oversight**.

The Foundation, which initiated the creation of Prevent2Care alongside INCO, is proud that more than **160 start-ups** are now among the alumni of health prevention innovation.

PREVENT2CARE FRANCE COHORT #6

11 start-ups:

- **Axelife**: prevention of cardiovascular risk
- **Cérébro**: tools platform for speech therapists
- **Datus**: plant-based alternative to coffee made from dates
- **Réciproq**: platform for referrals between psychologists
- **Noviga**: AI screening for sleep apnea syndrome in cardiology
- **Foodelles**: application to transform eating behaviors
- **Wellwithwaves**: radio-protection equipment for prevention of musculoskeletal disorders
- **Heegee**: digital pain therapy
- **Floating genes**: cancer screening technology using blood samples
- **Fasten**: digital and nutritional therapy to support cancer treatments
- **Audya**: support for hearing-impaired patients

4 associations:

- **École comestible**: education for sustainable and enjoyable eating
- **Vaincre Alzheimer**: fight against Alzheimer’s disease
- **Fondation du souffle**: fight against respiratory diseases
- **Pet’s rescue**: placement of animals in specialized structures

Evaluation

Prevent2Care France – Cohort #6:

- 160 applications received (+23% versus the 5th cohort)
- **15 projects selected: 11 start-ups (including nutrition) and 4 associations**
- Close monitoring: every project is discussed in a steering committee with partners every 15 days
- 100% of meetings between partners and incubated projects are accompanied by INCO
- 35 thematic workshops for skills development
- Nearly 80 Group employees involved (as juries, experts, etc.)
- 6 pilot projects/tests currently underway
- **The selected projects are higher quality, and less likely to stop their activity after incubation:**
  - Cohort #6: 87% of projects still active one year after incubation
  - Cohorts #4 and #5: on average, 78% of projects still active one year after incubation

Key Figures – Start-ups:

- Over €550,000 in turnover generated since 2024
- 80 jobs created or maintained
- Over 2,300 clients for the start-ups

Key Figures – Associations:

- Over €1.7M annual budget for supported associations in 2024
- 200+ active volunteers within the associations
- Over 100,000 beneficiaries reached

Media & Social Media:

- 30 press mentions
- 19 posts published
- 211,000 impressions and more than 11,000 impressions on average per post (+83%)

Satisfaction:

- 100% of incubated projects found the networking with partners useful for their development (versus 77% for cohort #4 and a satisfaction rate of 67% for cohort #5)

International – Prevent2Care Nordics (Sweden, Denmark, Norway) – Promotion #3:

- 30 applications (same as previous year)
- **5 start-ups supported (4 Swedish, 1 Danish)**
- Over 10 workshops
- 5 recruitments during incubation period
- 25 jobs, including 11 recruited during incubation, and 9 planned
- 40% of projects are in a fundraising phase

EXAMPLES OF SUPPORTED PROJECTS:

- **Paindrainer**: mobile medical device for chronic pain patients
- **Qinematic**: technology for analysis and support of physical activity
- **Stepup**: patient support device for COPD
- **Saluto**: AI for evaluating health data to motivate behavior change
- **Closar**: solution for harnessing data from connected health devices

3rd Sweden, Norway, and Denmark cohort: 5 start-ups

The Prevent2Care Tour completes its 5th prevention tour

The 5th edition of the Prevent2Care Tour covered 12 regions, with five stops in **Lyon, Bordeaux, Nantes, Strasbourg, and Paris**.

This prevention tour, organized in five stages, **rewards associations whose initiatives have been considered relevant in meeting the needs and expectations of the regions in terms of health prevention**. Each receives a €10,000 grant, allocated by the tour's partners. The tour also allows hospital and clinic teams to participate in local juries and provides opportunities to interact with associations regarding potential joint actions.

Foundation support: €25,000

Evaluation

- 12 regions: Auvergne-Rhône-Alpes, Bourgogne-Franche-Comté, Brittany, Centre-Val de Loire, Grand Est, Hauts-de-France, Île-de-France, Normandy, Nouvelle-Aquitaine, Occitanie, Pays de la Loire, Provence-Alpes-Côte d'Azur
- Over 90 applications received
- 5 winners
- €50,000 in grants awarded
- Around forty Group staff involved (juries, discussions, etc.)
- Media coverage: 32 press mentions

Awarded associations: **Corps en Révolte** (photo), Solidarité Réhabilitation, Collectif Opéra, Drepaland, D.E.B.O.R.A

Health Literacy Training in partnership with Croix-Rouge Compétence

Health literacy: knowing how to inform to provide better care

In consultations, at the hospital, or during prevention and screening campaigns, nearly one out of two adults encounters **difficulties in understanding and using health information, with consequences on prevention, access to care, care management, and ultimately, quality of life**. To address this, Croix-Rouge Compétence has developed, thanks to the sponsorship of the Ramsay Santé Foundation, **an innovative online training tool—a serious game accessible to all**.

- **Objective**: improve the ability to convey, inform, understand, assess, and apply health information.
- **Target audience**: learners from the Croix-Rouge Compétence training program, French Red Cross volunteers (75,000 volunteers, 18,000 employees), and the general public.
- **Format**: a short (30-minute) e-learning module in the form of a serious game, featuring scenarios between a person concerned about their health, their relatives, and healthcare professionals, followed by a debriefing.
- **Purpose**: facilitate communication between patients and healthcare providers and combat misinformation.

Foundation support: 20 000 €

Evaluation

- Drafting of the synopsis
- Analysis, evolution, and modification of the 3 phases of the game
- Creation of a “serious game” completed by 2 debriefing videos

A dedicated evaluation tool for associations

A number of associations supported by the Foundation have reported difficulties in monitoring the performance of their actions and in evaluating them, due to a lack of time, budget, trained personnel, and suitable tools.

To address this need, **the Foundation initiated support aimed at identifying and making available a dedicated digital tool**.

Despite the proximity of the support, the completion of tests, and the involvement of the associations, engagement was variable, and **the uptake of the tool was not sufficient to allow for its generalization and broad implementation**.

Evaluation

- Tool tested by 8 associations and feedback collected
- 1 webinar to present the finalized monitoring tool
- 4 individual follow-up meetings with associations wishing to apply it within their organization
- **2 associations use the tool on a daily basis**

Strengthening
LOCAL ACTION

In July 2024, the Foundation decided to intensify its health prevention efforts in the local territories by supporting grassroots projects in partnership with local associations. The Foundation also wanted to allow employees in France to participate in this commitment by taking part in the selection through a vote.

Six projects are supported by the Foundation for three years, up to July 2027 in France. The two Scandinavian supports will be re-evaluated for 2025-2026.

Supported Projects in France

ADSF – Agir pour la Santé des Femmes

The Ramsay Santé Foundation supports the actions of ADSF – Agir pour la santé des femmes, which assists women in situations of great precariousness. Through its mobile teams, drop-in centers, and day centers, the association follows nearly 2,700 women. In 2024, it carried out nearly **1,000 medical, psychological, or health mediation interviews and welcomed more than 1,500 women** (in Paris and Lille), f**ocusing on gynecological, psychological, and social prevention.**

Foundation support: €30,000

“The Foundation’s support is based on a commitment to sustainable funding and genuine on-the-ground involvement. Collection of hygiene products within facilities, interactions with employees, and the creation of pathways to improve care for women supported by ADSF... We are convinced that every action matters to make this partnership ever more humane.”
Virginie Petit, Head of Fundraising and Donations

Avec nos proches

“Avec nos proches” is an association that supports all caregivers looking after someone made vulnerable by illness, disability, or age. Beyond financing projects, **the Foundation supported**

“Caregivers’ Health Month” in April, raising awareness among caregivers and staff about burnout and the health of family caregivers.

During one month, the association offered **four themed webinars**, an online **information platform**, and **four events** in large institutions. These meetings raised awareness among more than 100 caregivers, promoting exchanges to better identify and support these often isolated and physically and psychologically distressed caregivers.

A concrete action in health prevention, carried out close to the field, and set to continue.

Foundation support: €30,000

Centres Relier

STOP Cyberviolences is a program developed by the association Centres Relier, which the Foundation supports to prevent cyberviolence among young people. Thanks to an **interactive platform, a conversational AI agent, and a mental health barometer**, the project acts upstream to avoid serious consequences (psychological distress, school phobia, isolation). It is operational in middle and high schools, and will soon be available in primary schools. **34 institutions in 13 educational districts are already participating.**

Foundation support: €30,000

Nightline

The “Nightline CPGE/BTS” program, supported by the Foundation, has raised **awareness among more than 750 students and 50 professionals about mental health prevention in high schools in Île-de-France and Occitanie**. This system works upstream to avoid psychological disorders linked to academic pressure, and trains both students and staff. An impact assessment accompanies the program, which will be extended to the Overseas territories.

Nightline also offers a helpline and “student sentinel” initiatives, presented at the Prevention Health Meetings in April 2025 focusing on youth and stress.

Foundation support: €20,000

Fondation Santé des Étudiants de France

With the Fondation Santé des Étudiants de France, the Ramsay Santé Foundation supports **Peer Care, a peer-prevention program** against the risks related to excessive alcohol consumption in student environments, especially engineering schools that are particularly exposed to this risk. **Based on e-learning and practical workshops, the program is being tested** and will be deployed at the start of the 2025 school year, with an impact study planned.

Foundation support: €20,000

Banlieues Climat

Thanks to the Foundation's support, Banlieues Climat continues its project to raise awareness and take action with young people from working-class neighborhoods on environmental and health issues. In **26 priority neighborhoods, 465 people have been trained** (six times more in two years than the previous period), and a Popular Climate School has been launched. Thanks to this structure—whose diploma, a short-term certificate, was validated by the Ministry of Higher Education—**35 young people have now become trainers themselves** on the challenges of ecological and energy transition.

Foundation support: €20,000

International Projects Supported

Team Rynkeby (Norway and Denmark)

As part of the **Group's presence in Denmark and Norway**, the Foundation chose to support Team Rynkeby, a European charity initiative that brings together over 2,600 cyclists across Europe to Paris to raise funds for children with cancer. This solidarity project, combining prevention, sport, and solidarity, **raised €8.5 million in the 2024-2025 season**.

Foundation support: €20,000

MSF DTx Project in Sweden

As part of the **Group's presence in Sweden**, the Foundation supports **the DTx project by Médecins Sans Frontières Sweden**. Deployed **in Lebanon, this offline-accessible digital therapy helps patients with diabetes** better manage their treatment and prevent serious complications (hypoglycemia, hospitalization, amputations, etc.). With **12 educational modules, seven mobile units, and two trained clinical teams**, DTx strengthens patient autonomy and quality of life, focusing on daily active prevention. The program is being progressively rolled out to hundreds of users out of a total of 2,000 patients.

Foundation support: €20,000

ACCOMPANIMENT PROJECT

Fondation du Souffle: raising awareness about respiratory health

The Fondation du Souffle, supported during the 6th Prevent2Care, received renewed backing from the Ramsay Santé Foundation for prevention days. These aimed to **raise public and staff awareness of respiratory health, offer lung function testing to detect potential anomalies**, and direct affected individuals toward appropriate medical care.

Outlook:

- Renewal of prevention action
- Integration with actions conducted for HAS certification
- Partnership considered with the website mesquestionsprevention.fr to publish content on respiratory health.

Evaluation

- 2 half-days of awareness (Hôpital privé La Louvière and Hôpital privé Antony)
- Participation and screening: 135 combined participants, 105 lung function tests
- About 15 people referred to health professionals after anomaly detection

Promoting HEALTH PREVENTION

The goal is to inform and raise awareness as widely as possible among all healthcare stakeholders, our partners, stakeholders, and the general public about the importance of prevention.

8th Health Prevention Meetings

Youth and Stress: a Generation Under Pressure

Sponsored once again this year by the Ministry of Health and Prevention, the 2025 edition of the Health Prevention Meetings addressed the theme of young people and stress.

In a context marked by academic pressure, uncertainty about the future, the omnipresence of social media, eco-anxiety, etc., the Foundation sought **to understand how stress manifests itself among young people**. After identifying the main causes, as is done at every edition, the conference also **looked at possible courses of action**.

The Ministry of Health was represented by the Delegate for Mental Health and Psychiatry, and **for the first time, a young person/parent duo was invited to share their experience alongside experts, healthcare professionals, and field actors**, aiming to compare their experiences and imagine practical prevention and care strategies together.

The debate was largely based on the results of the 2nd Stress Observatory, a survey conducted for the Foundation by OpinionWay "Stress: perspectives and behaviors of the French, Italians, and Swedes," thus allowing a perspective on the current situation and its evolution since the first survey in 2017.

This theme followed the ongoing commitment of the Ramsay Santé Foundation to mental health, the **Major National Cause for 2025, led by l'Alliance pour la santé mentale of which the Foundation is a sponsor**.

With this edition, the Foundation reconnected with its audience, which had been less present on the topic of young people and fake news in health.

It is worth noting that the replays, available on the Foundation's website, remain accessible beyond the actual event.

Evaluation

- Sponsored by the Ministry of Health and Access to Care for the 8th consecutive year
- **948 registered for the webinar**
- 420 people connected live
- 1,304 views (YouTube replay + short videos of speakers)

Publication of the White Paper from the Health Prevention Meetings

The white paper, compiled from discussions during the Meetings, was published in June 2025. It summarizes the main points covered during the online conference and was sent to relevant stakeholders.

In 2024, the hospital funding crisis had prevented a release immediately after the event. However, **the Foundation took advantage of the Ministry of Health's focus on the fight against misinformation in health to distribute the white paper "Youth and Health: The Fight Against Fake News."**

The white papers are available and can be downloaded from the Foundation's website.

Evaluation

- Emailed to 3,800 active Foundation contacts and all participants of the 2025 Meetings
- Sent via newsletter #7 and on social media
- 264 views on the website

The 2nd Stress Observatory

The Foundation published this year the results of the second edition of its Stress Observatory (eight years after the first survey in 2017), a study conducted by OpinionWay **in France, Italy, and Sweden, aiming to analyze perceptions and behaviors related to stress**.

This project is fully aligned with the Foundation's mission to promote health prevention to the general public, relying on major surveys. The Observatory helps to better understand stress factors, identify populations at risk, and guide the implementation of targeted prevention actions. **This approach increases the Foundation's visibility on a major public health issue.**

A focus on young people (18–24 years old) was analyzed during the Meetings dedicated to "Youth and Stress."

To ensure wide dissemination and high visibility, the Foundation rolled out a media plan for journalists.

Evaluation

- Study conducted with 3,001 people in France, Italy, and Sweden
- 223 views on the Foundation's website
- 17 press mentions
- **Total audience: 1,160,000 people**

Alliance pour la santé mentale

L'Alliance pour la santé mentale is a coalition of committed organizations since January 2024 aiming for better understanding and management of mental health issues. **One of its leading actions was to obtain recognition for mental health as a Major National Cause for 2025.**

The Alliance called upon the Ramsay Santé Foundation to provide support for mobilizing civil society, professionals, and institutions to make mental health a political and societal priority.

The support was reinforced by choosing the theme "Youth and Stress" for the Health Prevention Meetings in April 2025, to strengthen advocacy on this subject.

Foundation support: €20,000

Evaluation

- Official sponsor of Alliance pour la santé mentale

The 6th #1pas1don #IWalkIGive Challenge

The #1pas1don #IWalkIGive solidarity challenge has been held for five years. It meets a threefold objective: supporting a prevention-focused association, rallying and involving Group employees and practitioners, and encouraging staff to walk for their health.

This 6th edition brought together 5,207 employees and doctors (compared to 5,365 the previous year) who walked for 12 days for the same association. **This year, Italy joined the other four participating countries**, making it a Group-wide event. It was important for everyone to feel concerned by the cause supported.

The Foundation allocated a donation of €50,000 to Médecins sans Frontières to support the TacTic project against childhood tuberculosis in Niger.

The game format was also adapted to illustrate the European dimension, allowing participants to "walk" from one country to another.

Foundation support: €50,000

Evaluation

- Period: 26 September to 7 October 2024
- **5,207 participants**
- 1,146 teams
- Over 506 million steps in total
- **354,861 km covered**
- Hundreds of messages exchanged by walkers as part of their physical activity

First Skills-Based Sponsorship Initiatives

The Foundation launched its first skills-based sponsorship initiative, enabling Group employees to present their professions to young people seeking career guidance or reintegration, during their working hours.

These encounters—workshops, testimonials, or site visits—aim to **give young people concrete insight into various professions and inform them about their future prospects**. The participating employees, supported in their mission, thus showcase their expertise and societal commitment.

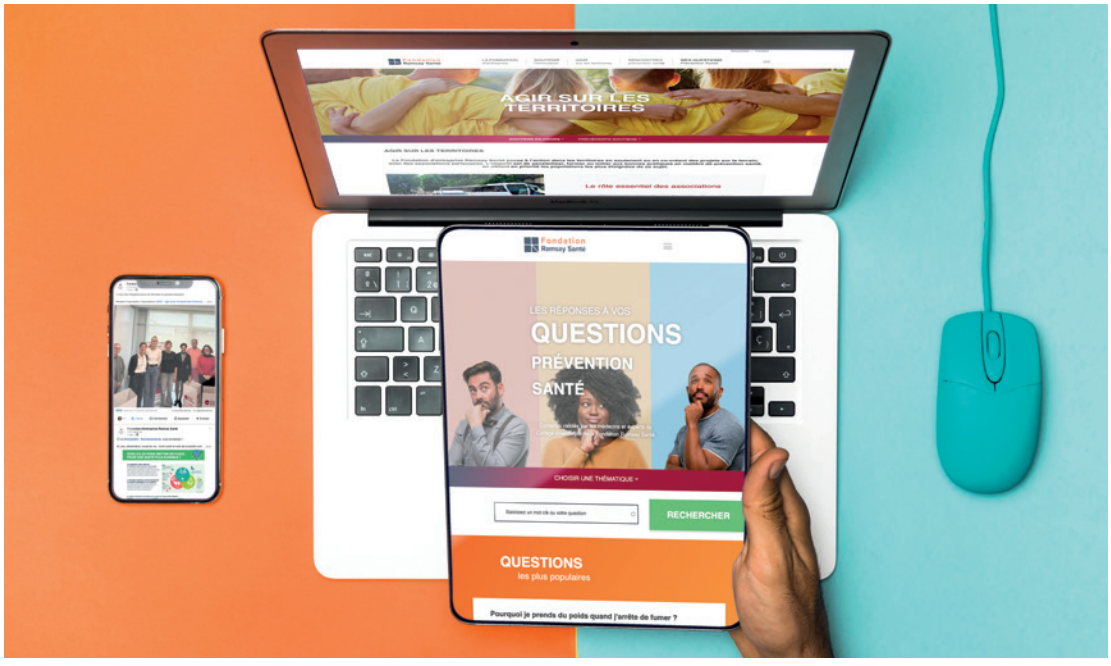

This project, carried out in partnership with the Innov'Avenir program (Les Entreprises pour la Cité), was piloted in 2024 at the Atlantique Clinic (La Rochelle), then at Médipôle Lyon-Villeurbanne (February 2025), and at Antony Hospital (June 2025).

Evaluation

- Two-hour workshops
- February workshop: a class from Villeurbanne
- June workshop: young people supported by the local youth mission in Antony
- • Three applications received for apprenticeship contracts and placement of a young person for porter shift work

Inform and PROMOTE

Information and digital communication are an integral part of the Foundation's awareness strategy. Multiplying channels enables the dissemination of reliable and accessible messages, contributing to the fight against health misinformation by reaching a broader and more diverse audience.

The Foundation's Website

The showcase of our actions and commitments in health prevention.
Designed as an information platform, the website reflects the Foundation's values, actions, and news.

Evaluation

- 161,044 visits (compared to 65,278 the previous year)
- 242,275 pages viewed (versus 102,432 the previous year)
- Average visit duration: 16 seconds (versus 24 seconds)
- 5,927 views on YouTube
- The sponsorship campaign strategy is exclusively focused on "Mes Questions Prévention Santé"

Mes Questions Prévention Santé

A foundation of expert information to be highlighted.
Integrated into the Foundation's website, "Mes Questions Prévention Santé" offers concise answers, validated by the Foundation's Scientific Committee, to users' questions in nine key health prevention categories.
This year saw the completion of all content updates. The Google sponsorship campaign targeted the stress topic for six months, in line with the Health Prevention Meetings and the Stress Observatory.

Evaluation

- 3,903,189 impressions (versus 5,088,633 last year)
- 138,710 unique clicks (versus 164,606 last year)
- The campaign focused on increasing the notoriety of Mes Questions Prévention Santé

LinkedIn

The Foundation's page is growing, with an increasing number of posts.
The LinkedIn page shares the Foundation's news since September 2022. Target audience: healthcare professionals, institutions, start-ups, associations.

Evaluation

- 1,830 followers as of June 30, up 615 in one year
- 127,358 impressions and 17,741 video views from posts
- Engagement rate: 8% (compared to 6.5% last year)

Financial Statements 24/25

For the 2024-2025 fiscal year, the total allocations (grants) for the Foundation amounted to €1,064,000.

The annual allocation fully covered the expenses of the 2024-2025 fiscal year, resulting in a surplus of €63,720.55.

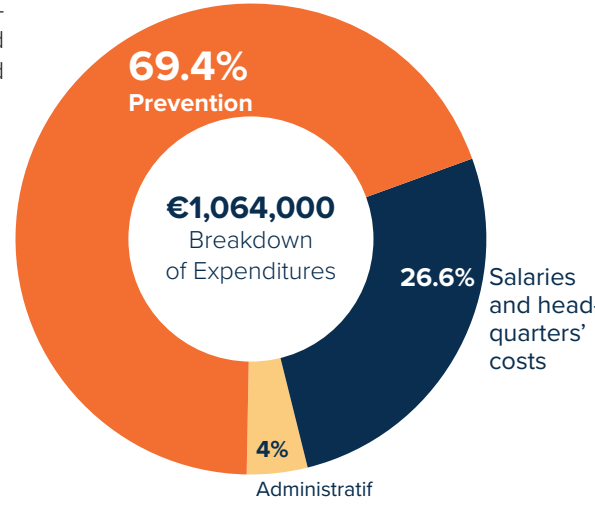

Accordingly, the closing balance for the carry-forward account will be a credit of €297,234.68 after allocation of the result.

The total expenditures for the 2024-2025 fiscal year amount to €1,000,279.45 (including salaries and share of headquarters' services and premises). Expenditures excluding salaries and re-invoiced charges reach €734,623.09.

Total Expenditures

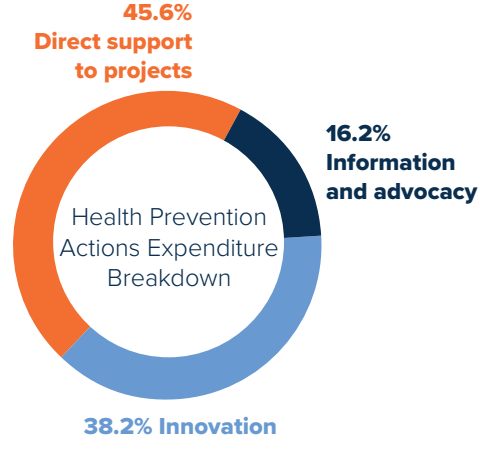

The overall expenditures total €1,000,279.45 for the year 2024-2025. The fiscal result is €63,720.55.

The carry-forward balance as of June 30, 2025, will show a credit of €297,234.68 for the following year after allocation.

"Health Prevention" Expenditure

The Foundation demonstrates its commitment to carrying out actions that are both diverse and yet **coherent and impactful**. Nearly half **(45.6%) corresponds to direct support for projects**, illustrating concrete engagement with local stakeholders. **Innovation represents a significant share with 38% of actions**, reflecting the desire to explore and promote new approaches to health prevention. Finally, **16.2% of actions are dedicated to information and advocacy**, showing the importance placed on raising awareness and mobilizing around public health issues.

Outlook 25/26

Strengthen our advocacy through impactful events to put health prevention at the heart of public action

Offer Group establishments a call for projects to support associations working for health at the heart of local communities and allow employees to take engaged and local action

Promote ownership of the Foundation among Scandinavian teams by deepening their understanding of the local non-profit sector

Develop structuring partnerships with existing partner associations (Fondation du Souffle, ADSF, etc.)

Give new momentum to the #1pas1don #IWalkIGive challenge

Create an Instagram account under mesquestionsprevention.fr to share health prevention messages with the general public and fight against fake news

Make a stress scale available to the public, allowing for scientifically validated self-assessment
